

Q-SPACE

Nowadays we see that more and more organisations outsource their ICT infrastructure. Successful businesses concentrate on their core activities and whilst ICT can add value, it is a means to that end. As a solution, **Qurius Cloud Solutions** has developed 'Q-Space'; a 100% customer specific 'workspace' according to your unique requirements.

Virtual Office

Q-Space is dedicated to the outsourcing of the maintenance of a customer specific ICT environment, and can be compared with a virtual office where the employees can always access their applications no matter where they are 24/7. This ensures your employees can perform their job in an efficient, effective, secure and uninterrupted manner.

From your core Microsoft Dynamics (NAV/AX/CRM) applications to your standard Microsoft Office, Visio, Project, and/or your Infrastructure, everything can be maintained by Qurius. Even customer specific applications can be included.

A significant benefit of this approach to maintenance is that you keep the ICT costs transparent with a known fixed price per month, which can increase or decrease according to your changing demands. With Q-Space, we ensure that your employees can concentrate on core activities, adding value to your business; we take care of your ICT!

Q-Space varieties

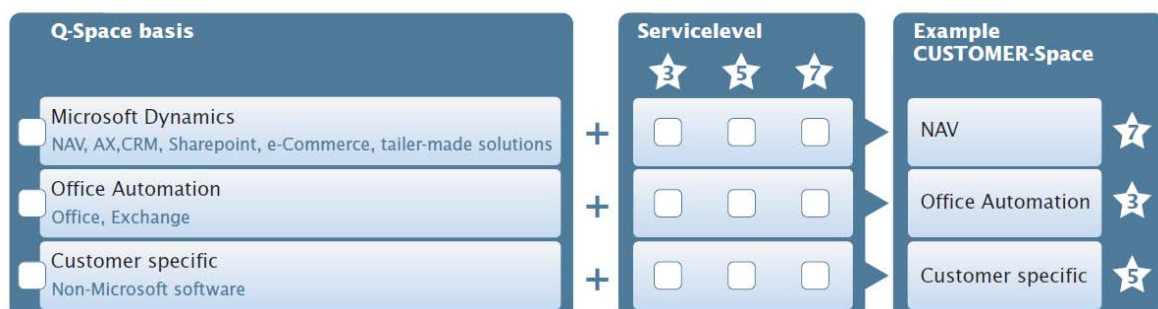

Based on your wishes, Q-Space can be fully tailor-made to be your own customer specific workspace, and has many similarities to a tailor-made holiday. For your holidays for instance, you can choose bed and breakfast, half board or all-inclusive. The level of importance you assign to service and quality will determine the cost.

Moreover, it is possible to determine a suitable Q-Space per application, giving you maximum flexibility and freedom of choice.

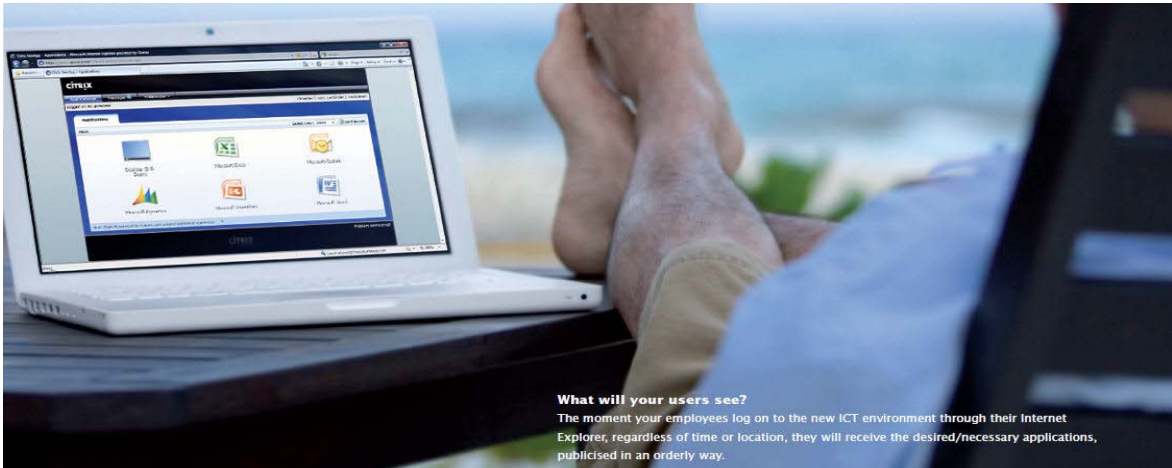

Choices

This makes it possible to choose a 7* for your core application, maybe Microsoft Dynamics NAV, a 5* for your email environment and a 3* for PowerPoint. You can determine which applications require which level of support with Q-Space.

The following outlines the diverse possibilities

In addition to Q-Space basis you can make a choice from the preferred service levels 3*, 5* or 7*.

What will your users see?
 The moment your employees log on to the new ICT environment through their Internet Explorer, regardless of time or location, they will receive the desired/necessary applications, publicised in an orderly way.

Strengths in brief

- "Green!"
- Protection against fire and burglary
- Certified for optimal security
- Facilities staffed 24/7
- Completely redundant
- Virtualisation
- Load balancing
- Backup and restore guaranteed
- Skilled servicedesk
- Antivirus/spam/spy/malware

Advantages

- Focus on core business
- Controlled internet usage
- Pro-active monitoring and licence registration
- Technical support and maintenance
- Server Based Computing

For an introduction without obligations

- Are you about to make a significant investment in your ICT infrastructure?
- Are you ready to partly or wholly outsource the maintenance of your ICT environment?
- Would you prefer to concentrate on your core activities?

If these advantages appeal to you or if one or more of these questions are currently on your mind it is time to contact us. Our professional consultants will gladly inform you about the possibilities of your CUSTOMERSpace.

Qurius provides technology answers: design, architecture, infrastructure, deployment and systems management of Microsoft-based business and IT solutions. Headquartered in Zaltbommel, the Netherlands, we serve customers across Europe, including Austria, Belgium, Germany, the Netherlands, Spain, the United Kingdom and the Czech Republic. In 2010, we openly declared a target of 100 per cent sustainability by 2014. A bold objective, designed to drive the company to European leadership in the field of sustainable ICT. We aim to be the number one choice for customers with the same ambition and the same sustainability goals. Qurius has been publicly quoted on Euronext Amsterdam since 1998.
